## ART LOUVERS™

## TECHNICAL SPECIFICATIONS

### GENERAL

Smart Glass Systems is now the exclusive manufacturer of Art Louvers™ adjustable art louvers for window and wall openings.

Now there is an elegant alternative to blinds, draperies, and shades. Instead, create distinctive interior and exterior window and wall opening designs by using the Art Louvers system.

Just a few of the myriad features are below:

Art Louvers function as art displays while providing practical partitioning and privacy. Translucent images come alive with natural or artificial backlighting conditions. The high-resolution images will create spectacular results.

More of the truly innovative features of Art Louvers are:

- High resolution art images
- Virtually no size limit
- Art will be viewable from inside as well as outside
- Interchangeable slats for seasonal, event-driven variety
- Translucent images provide colorful results
- Images on glass are UV-resistant ceramic-ink
- Can be installed DIY or by a contractor
- 100% privacy available
- Flat or overlapping louver closure available
- Can be supplied with "blank" slats for art or appliqué to be applied by customer
- Adjustable friction pivots
- Motorized feature coming soon

### ART LOUVERS™ OPTIONS

The typical configuration of Art Louvers system uses vertical, tempered glass, individually pivoting louvers with a UV- and weather-resistant ceramic-ink image on one side. Standard sizes are available.

Custom configurations can be easily made by changing the louver orientation, closure, control type, pivoting style, slat material, and the art image itself.

There's virtually no limit to your choices of material, image, and combination of features that can be built into each system.

Following are the customizable features of the Art Louvers system:

<b>Louver Orientation</b>	Vertical, Horizontal
<b>Closure Configuration</b>	Flat, Overlapping
<b>Pivoting Configuration</b>	Adjustable Friction Center, Offset Channels & Standoffs
<b>Control</b>	Individually Rotating, Soon: Simultaneous & Motorized Simultaneous
<b>Slat Material</b>	Tempered Glass, Wood, Acrylic, Polycarbonate, Metal, Video Screen
<b>Louver Art</b>	Opaque or Translucent, Positive or Negative Photo Image, High Resolution Color, Grayscale, Holographic, Etching/Engraving, Original Art, Textured Surface
<b>Electronic Backlighting</b>	120VAC, 12VDC, 24VDC, Battery
<b>System Hardware Construction</b>	Aluminum, Steel
<b>System Hardware Finishes</b>	Anodized, Brushed, Polished, Painted Aluminum, Painted Steel, Wood Veneer
<b>Installation</b>	DIY or Contractor
<b>System Dimensions</b>	Standard or Customized to each opening
